

FOR IMMEDIATE RELEASE

Modern design meets latest technology. Floor Stand Metal to Appear at the ICFE 2013 in New York

Modern design redefined by Contemporary technology

New York, NY (May 8, 2013) — zeitgeist, inc. manufacturer of display stand will be introducing simple yet functional Bauhaus inspired pipe frame TV stand at ICFE. Inspired by modernist chairs, we created FSM TV Stand to support the latest HDTV's. This iconic stand is based on a cantilever, a beam anchored only on one end. Its curving steel beam is not only elegant but also strong. A glass shelf in its center holds the latest Blu-ray player or other media player. It also features internal cable routing to keep wires hidden. The FSM TV Stand. Clean, simple, and refined. It captures the zeitgeist of both the modern era and our contemporary era.
